- ☐ Over 25KG

DISCLAIMER: It is unavoidable with certain items to avoid variations between shipments on product colours, sizes and styles. Please request samples from current stock shipment if concerned. Product style and colour variations may occur without prior notice. No print method (bar laser engrave) is absolutely permanent. Sunlight exposure, scratching, rubber, cleaning, hand lotions, chemicals and general wear and tear can affect the durability of the print. Some products may appear to have scratches, scuff marks, blemishes and wrinkles which occur naturally during manufacturing and packing process. Any printed products are not recommended to be put through the wash. Hand washing only to avoid colour fading and breakage. Some items are not perfectly straight, therefore square, rectangular and blocked artworks may cause optical illusions or distortion, special on rounded surfaces. The utmost care is taken to ensure print colours match as closely as possible, but due to colour and nature of materials, a 100% colour match is never guaranteed. All materials print differently, so if your logo is applied to multiple items variations in print colour may occur. We cannot guarantee solid ink coverage on some products. Digital printing works best for this type of design. Ink coverage may vary when a light colour (white, yellow, orange) is used on a dark background as some ink colours have some transparency. We cannot print stipples or half tones. Solid coated pantone colours only. Due to printing methods used on full colour printed items we cannot guarantee colour matches or colour consistency as they are printed in CMYK only. We cannot print metallic colours in digital printing. Be aware that any other elements set to overprint may not appear the same colour as viewed on the PDF proof when printed. No two stess shapes are exactly the same in shape, colour or density. As stress shapes are hand cut, not all edges and mold lines will be consistently smooth. White streess shapes eventually turn yellow and sunlight or heat accelerate this. PU ink is transparent and impossible to guarantee a consistent, uniform imprint. Stress shapes will tear if enough force is appied. Stress shapes are not toys are not suitable for children or animals. Select bulk confectionery are supplied without nutritional panels and content labels. It is the resullers responsibility to meet food and safety regulations. Confectionery is sourced from multiple manufacturers. Variations in bag and size may apply. Due to the manufacturing process, some breakup of confectionery is unavoidable. Due to health regulations, once confectionery has left our premises, products cannot be returned under any circumstances. We recommend confectionery is stored in a cool drey area with temperature less than 22 degress. Variations can occur within an order and from order to order. Line drawing is for appoximate print positional purposes only. It is not intended to be an exact scale or detailed representation. Colour proofs are to be used as a guide only.
